HydroXoil Pro® Handheld Moisture Meter

SPECIFICATION

General description: Universal handheld meter for HydroXoil sensors (e.g. SMT100 moisture and soil temperature probe)
Large LCD display
Single button foil keyboard for easiest operation
Ultra low power consumption for extended battery life
Optional customer specific versions on request

Housing: IP40 protected rugged field device

Sensor compatibility: All HydroXoil sensors with compatible interface/connector

Interface: RS485 with TBUS
RS485 with Modbus
SDI-12

Power: 9 V battery

Connector: 5 pin DIN type

Dimensions: 184 mm x 85 mm x 55 mm

Delivery contents: Handheld meter without sensors
9 V battery

Applications: Laboratory and field use, e.g.

- » General agricultural and horticultural applications
- » Nurseries: pot plant and container plant production
- » Gardeners: golf course, sports grounds irrigation
- » Universities and research institutions
- » Hydroponics
- » Other applications in science and industry for material parameter measurement
